

INDEX
TO
PANZER'S
FAUNA INSECTORUM
GERMANIÆ.

EDWARD SAUNDERS, F.L.S.

LONDON:
GURNEY & JACKSON, 1, PATERNOSTER ROW.
(SUCCESSORS TO MR. VAN VOORST).

MDCCCLXXXVIII.

1888

DATES OF PUBLICATION

AS GIVEN ON THE INDEX OF EACH JAHRGANG.

1ST EDITION—

1st Jahrgang, Hefts	I—XII		1793
2nd do. do.	XIII—XXIV		1794
3rd do. do.	XXV—XXXVI		1796
4th do. do.	XXXVII—XLVIII		1797
5th do. do.	XLIX—LX		1798
6th do. do.	LXI—LXXII		1799
7th do. do.	LXXIII—LXXXIV	...	1801
8th do. do.	⁸⁵ LXXXV— ⁹⁶ XCVI		1805
9th do. do.	XCVII—CVIII		1809
Heft CIX			1813
do. CX			?

2ND EDITION—

1st Jahrgang, Hefts	I—XII		1796
2nd do. do.	XIII—XXIV		1799

After this I can find no further Indices.

P R E F A C E.

ANY one who possesses a copy, or part of a copy, of Panzer's *Fauna Insectorum Germaniæ* must, I think, feel the want of an Index to it. I possess a copy myself, and in order to make it useful, I found it absolutely necessary to prepare this Index, and, in hopes that what has been necessary to me may be useful to others, I offer it for publication.

That it is far from perfect I have little doubt, as the book is a very difficult one to index satisfactorily. It is in 110 Hefts, and has two Editions. Each Heft consists of 24 small loose, coloured plates, and 24 corresponding small sheets of letter-press, each figuring or describing one species respectively; these are contained in a wrapper of coloured paper, on which is printed a list of the species in the Heft, and the whole is slipped into a cardboard case or pocket open at one end.

The 1st Edition was commenced in 1793, and appeared at intervals up to 1813, each 12 Hefts being followed by an Index arranged systematically, and bearing a date; these dates are given at page 2.

The 2nd Edition began in 1796, to which date the Index ascribes the first 12 Hefts, and the Index to the second 12 Hefts bears the date of 1799; after that I can give no further dates, as I can find no further Indices to the 2nd Edition, and it is on these Indices that I have relied for the dates. Still, there is certain proof that the 2nd Edition was carried further; in fact, I think there is evidence to show that the 2nd Edition, or a reprint of the 1st, was continued almost to the end.

It is only, however, up to the end of Heft 37 that the 2nd

Edition is of much consequence, as far as an Index is concerned, as after that Heft the two Editions are identical in all important matters. Up to that point the differences in the numbers and in the names given to the species are very numerous, so that, unless a writer knows which Edition he has before him, constant confusion may arise from wrong quotations, &c., and this difficulty is increased by the fact, that very few copies seem to be uniformly of one Edition. I have been able to consult five or six, and not one is complete throughout as a 1st Edition. I may here remark, that the numbers on the letter-press of the species in Heft 2 do not agree with the wrapper throughout in either Edition.

It is not always easy, nor is it possible I believe in every case, to say for certain whether a plate and its letter-press belongs to the 1st or 2nd Edition. The two Editions can be distinguished up to Heft 25, as far as the *Coleoptera* are concerned, because the 2nd Edition quotes a work of Panzer's ("Entomologia Germanica") which was published in 1795, after the 24 Hefts of the 1st Edition had appeared. This work, however, only treats of the *Coleoptera*, and for the other Orders one can only be guided by occasional quotations and remarks, and the less careful colouring and less distinct outlines. The plates of the 2nd Edition appear to have been in most cases merely struck off the old plates of the 1st Edition; but, in some, an enlarged figure of the species has been added, and in others entirely fresh plates seem to have been used.

The wrappers of the Hefts often show more plainly the Edition than the plates themselves. The 1st and 2nd Hefts of the 1st Edition have the printing of the headings of the wrappers, viz., "*Inhalt des —ten Hefts,*" in much larger type than those of the 2nd, and the line under it is widened in the middle; also the wrapper of the 1st Heft in the 1st Edition gives no authors' names. From the end of the 2nd Heft up to the end of Heft 25, in the 1st Edition, "*Inhalt des —ten Hefts*" is all in one line; whereas, in the 2nd Edition, "*Inhalt*" is placed

in a line at the top by itself. Up to the end of the 32nd Heft in the 1st Edition, "*Inhalt*" is printed with a long *J*, whereas it is short in the 2nd, and from the 28th Heft to the end of the 37th in the 2nd Edition, the line under the heading is long, *i. e.*; considerably longer than the "*Inhalt*," but in the 1st Edition it is quite short, and not nearly so long as the "*Inhalt*." From the end of the 37th Heft I can trace the 2nd Edition, or a re-issue of the 1st, up to the end of the 72nd Heft by the short line under "*Tab*" on the covers; in the 1st Edition they are just about the length of "*Tab*," or a little longer, in the 2nd Edition, or reprint, they are clearly shorter. After Heft 72, which would be the last of the 6th Jahrgang, I can find no trace even of a re-issue.

After Heft 37, as I mentioned above, both Editions are alike, as far as the numbering and names are concerned, but why no alterations occur after this date I have failed to find out. I think, however, it is probable that no changes were made after the publication of the "*Kritische Revision*" in 1806, and it is not improbable that the 3rd "Jahrgang" of the 2nd Edition would be completed about this time, or a little before it, as the 1st was dated 1796, the 2nd 1799. The curious point is that the alterations do not cease after the 36th Heft, which would be the end of the 3rd Jahrgang, but after the 37th. The 37th and the 38th in the 1st Edition are given up to species bearing the authority of *Kugelann* to their names on the covers; in the 2nd Edition, as one might expect, the authority is changed in the 37th Heft to that of other authors, as Fabricius, Illiger, &c.; but in the 38th *Kugelann* is retained throughout, and it is practically a reprint of the 1st Edition. After this point the only signs of a second issue with which I am acquainted are the slight differences in the style of printing the covers, sufficiently decided to show that they could not have been struck off the same plate as those of the 1st Edition, but of no importance at all otherwise.

My object in the following pages has been to give a com-

plete Index of both Editions. I have been helped to a great extent in the manual labour by an old, very carefully prepared, MS. of the late Mr. Adam White, which has come into my possession; this MS. purported to be an Index to Panzer, but had not been finished, *i. e.*, it had been completed only so far as the writing out of the names, the references not having been added, and it was compiled from a 2nd Edition copy. I have, however, made this the basis of my Index, adding the references, and including those to the 1st Edition where they differ from the 2nd, and have been saved a large amount of labour thereby.

I must here thank Mr. E. W. Janson, who has very kindly helped me throughout, and lent me several sets of Indices, covers, &c., without which I should have had great difficulty in ascertaining the relations of the two Editions.

EDWARD SAUNDERS.

St. Ann's, Mount Hermon, Woking :

1st September, 1888.
